SUMMARY REPORT
FT 930-1

October 1965

FOR RELEASE
December 3, 1965

IMPORT TRADE BY COMMODITY

The Bureau of the Census, U.S. Department of Commerce, announced today that the value of U.S. general imports, unadjusted for seasonal change, rose from $1,[illegible] million in September to $1,997.1 million in October,[1] [2] a gain of about 11 percent resulted from higher levels of imports of 9 of the 10 Schedule A commodity sections. Most of the gain was accounted for, however, by sizable increases in imports of food and live animals, manufactured goods classified chiefly by material, machinery and transport equipment, and beverages and tobacco.

Imports of food and live animals show an increase from $304.1 to $[illegible].5 million mainly due to a substantial increase in imports of coffee, from $83.5 to $128.[illegible] million.[2] This was partly offset by decreases in imports of cocoa (or cacao beans), from $14.5 to $8.9 million and fish and preparations, including shellfish, from $42.8 to $38.4 million. Increases in imports of copper and alloys, from $33.9 to $4[illegible].5 million; rough diamonds, from $2[illegible].2 to $[illegible].5 million; precious metals, from $[illegible] to $13.[illegible] million; and iron and steel mill products, from $[illegible] to $[illegible].8 million were the chief factors in the rise in imports of manufactured goods classified chiefly by material, from $4[illegible].1 to $504.[illegible] million. Imports of tin and alloys, also included in this section, dropped from $17.2 to $11.[illegible] million. Imports of machinery and transport equipment rose from $236.[illegible] to $282.8 million as increases were reported in imports of passenger cars, from $53.8 to $71.4 million; radio, T-V, and other telecommunications equipment, from $[illegible].2 to $35.7 million; nonelectric power generating machinery, from $13.5 to $18.[illegible] million; office machinery and computers, from $8.6 to $13.3 million; and parts, for automobiles, buses, trucks, and special purpose vehicles, from $7.7 to $12.[illegible] million. Increases in imports of whiskey, from $34.3 to $43.1 million and unmanufactured tobacco, from $1.5 to $6.2 million were the chief factors in the rise in imports of beverages and tobacco, from $43.[illegible] to $58.9 million.

Imports of inedible crude materials, except fuels rose from $252.7 to $263.7 million reflecting increases in imports of non-ferrous base-metal ores and concentrates, from $30.2 to $36.3 million; and oil seeds, oil nuts, and oil kernels, from $2.6 to $7.3 million. Imports of mineral fuels, lubricants and related materials increased slightly, from $177.1 to $179.1 million as an increase in imports of fuel oil, from $49.[illegible] to $61.9 million was largely offset by decreases in imports of crude petroleum, from $105.6 to $98.7 million; and natural and manufactured gas, from $[illegible].2 to $5.4 million.

From September to October, changes in the level of imports of the remaining Schedule A commodity sections were as follows: chemicals, from $69.3 to $72.1 million; Animal and vegetable oils and fats, from $9.9 to $8.8 million; miscellaneous manufactured articles, from $183.6 to $203.4 million; and commodities and transactions not classified according to kind, from $64.6 to $71.[illegible] million.

[1] On a seasonally adjusted basis, total general imports were valued at $[illegible] million in October as compared to $1,786.8 million in September. (See the October 1965 issue of Report FT 930-1.)

[2] Because of delays at certain ports in handling peak processing loads at the end of the maritime strike late in August, an undetermined amount of imports which would normally have been included in September statistics are reflected in the October total. Although the full amount of the abnormal carry-over resulting from the delay in receipt of entries which normally would have been processed for inclusion in the September statistics is not known, entries accounting for at least twenty five million dollars of coffee imports (71 million pounds) which normally would have been recorded for September were processed for inclusion in the October statistics.

EXPLANATION OF STATISTICS

COVERAGE. Import statistics include merchandise imported by government agencies as well as by private importers, but exclude American goods returned by the U.S. armed forces for their own use. U.S. trade with Puerto Rico and U.S. possessions is not included in this report but the import trade of Puerto Rico with foreign countries is included as a part of the U.S. import trade. Merchandise shipped in transit through the United States between foreign countries is not included in import statistics. However, the statistics may include some merchandise (principally duty free) which is entered through U.S. Customs and subsequently exported in the same condition in which imported. In many cases, such merchandise differs from intransit merchandise only in the manner in which it is documented.

VALUATION. The dollar value shown in the import statistics is defined generally as the market value in the foreign country, excluding the U.S. import duties, ocean freight and marine insurance.

RELIABILITY. Effective July 1965, monthly import statistics for individual commodities are based on full compilation of all shipments valued $251 and over (over 98 percent of the total import value) and are therefore free of sampling variability. They are, however, subject to some error due to the omission of all formal and informal entry shipments valued under $251 from commodity statistics. Prior to July 1965, monthly import statistics for individual commodities were based on full compilation of all formal entry shipments valued $100 and over (over 99 percent of the total import value) and thus subject to some error due to the omission from commodity statistics of all informal entry shipments (i.e. those valued under $251) and under $100 formal entry shipments. The statistics in this report are also subject to some error from such sources as the carryover of data from month to month in the compiling process and errors in reporting or processing. Although the effect of such errors on the rounded totals in this report is probably small, the possibility of inaccuracy should be taken into account particularly in using figures of relatively small magnitude. The largest variation from rounding of figures is $50,000.

Further information regarding coverage, valuation, compilation procedures and precision of import data is contained in the foreword of Report FT 125. For complete statement, see foreword in Foreign Commerce and Navigation of the United States.

For sale by the Bureau of the Census, Washington, D.C. 20233. Price 10¢ per copy.
Annual subscription (FT 900, 930, 950, 970, 975, 985, and 986 combined) $5.00.

U.S. GENERAL IMPORTS OF MERCHANDISE BY SELECTED SCHEDULE A COMMODITY GROUPINGS AND PRINCIPAL COMMODITIES
OCTOBER 1965 AND SELECTED PERIODS

(Quantity in units indicated; value in millions of dollars. General imports are commodities imported for immediate consumption plus entries into bonded warehouse. Imports for consumption are commodities imported for immediate consumption plus withdrawals for domestic consumption from bonded warehouses. Figures for 1965 are as originally issued and have not been revised to include published corrections. Figures for 1964 include all revisions published with December 1964 reports, or earlier, but do not include revisions published during 1965. Totals represent sum of unrounded figures, hence may vary slightly from sum of rounded amounts)

[1] See footnotes at end of table.

Commodity description and unit of quantity[1]	1965			1964		
	October	September	Jan.-Oct.	October	September	Jan.-Oct.
Nonferrous metals - crude, blister, refined, mill shapes and scrap--Continued						
Aluminum and alloys.....value..	24.3	20.6	220.2	13.8	22.2	176.0
Nickel and alloys, including nickel oxide.....value..	15.5	14.9	160.1	12.0	10.0	128.9
Tin and alloys.....value..	14.6	17.2	125.3	9.9	9.0	94.6
Manganese and chromium ore and metal (excluding ferroalloyed forms)[4] [5]....value..	10.1	7.9	74.5	6.9	4.9	53.9

*See footnote 2 on front page of this report.

— Represents zero.

Z Indicates less than $50,000.

[1]Based on the commodity classifications listed in Schedule A, Statistical Classification of Commodities Imported into the United States, as published in the special Census Bureau publication entitled "Changes in Presentation of U.S. Import Statistics Effective 1964." A "Supplement" to Report FT 930-I showing the coverage for the individual commodity totals in terms of the Schedule A classifications is available on request.

[2]Excludes, also, wool-like hair of other animals (see footnote 8) whether on or off the skin. Wool and wool-like animal hair on the skin are included under "Hides and skins, undressed, except fur skins;" cashmere goat-hair is included with "Fur skins, undressed." All unmanufactured wool and wool-like animal hair, whether on or off the skin, are combined in Part III of this table under the summary grouping "Wool unmanufactured (including on the skin)." See footnote 8.

[3]Consolidated in Part III of this table with similar commodities, dispersed among one or more other Schedule A commodity sections in Part III, and shown under appropriate descriptive headings.

[4]Includes ores of base-metals customarily used as ferroalloying materials: manganese, chromium, tungsten, titanium, molybdenum, vanadium, zirconium, etc.

[5]Includes base metals customarily used as ferroalloying materials but not yet processed into ferroalloys. (See footnote 4, above.)

[6]Parts and accessories for agricultural tractors are shown under "Transport equipment."

[7]Effective July 1965, represents estimated values for formal and informal import entries valued $250 or less. Prior to July 1965, represented estimated values for formal import entries valued at less than $100 and informal entries valued $250 or less.

[8]Includes carbonized wool and wool-like hair of other animals, on or off the skin—e.g. camels hair, alpaca, cashmere, vicuna, angora, etc.

SMALL-AREA DATA AVAILABLE ON MAGNETIC TAPES AND PUNCHCARDS FROM COUNTY AND CITY DATA BOOKS

A Valuable Tool for Marketing, Business, Social, and Other Research Uses

The Bureau of the Census now has available small area statistics in machine-readable form from the 1952, 1956, and 1962 editions of the County and City Data Book. These data can be provided on 80-column punchcards and IBM 1401 and Univac computer tape. Data from future editions of the County and City Data Book will be added to this machine-readable series.

Areas covered are: Counties, cities with 25,000 inhabitants or more, and standard metropolitan statistical areas. The 1962 edition includes data for unincorporated places with 25,000 inhabitants or more and for urbanized areas.

Subjects covered are: Agriculture; population; housing, retail, wholesale, and service trades; manufacturing; mineral industries, bank deposits births, deaths, and marriages, local governments, and others.

Costs are estimated as follows: Complete punchcard file for each edition, $1,000; county data only from each edition on punchcards, $800. Complete file from each edition on IBM 1401 tape is $300; on Univac tape, $350. Shipping costs are additional.

The 1962 County and City Data Book, the latest in the series, may be purchased from the Superintendent of Documents, Washington, D.C. 20402 or from local Department of Commerce Field Offices or consulted at those offices or major public libraries.

Orders for the tape and punchcard files or requests for information concerning them should be directed to:
